

Greener meetings

We have taken the following steps in our on-going quest towards hosting greener meetings at our venue:

- * We have removed all single use plastic bottles from our venue and only serve water in recyclable cans from a sustainable local supplier with a desire to make a positive global impact
- * We ensure that all our disposable cups, takeaway boxes, cutlery and straws are recyclable or biodegradable and are manufactured in the UK
- * We no longer supply stationery or gifts at our meetings and ensure our delegate lanyards are recyclable
- * We actively promote the use of technology for client meetings wherever possible
- * We have recently reviewed all our deliveries to campus by all our suppliers, which has led to the identification of greater efficiencies and a resulting reduction of our carbon footprint by 40%.
- * Our waste disposal contract ensures that all the waste produced is recycled, reused or converted into energy and we have a 0% to landfill policy
- * We have been ranked as a platinum top tier university by Uswitch, having met the criteria for green electricity tariff, green gas tariff, renewable installations, electric vehicles and eco-friendly initiatives.
